

Akash Sharma

Full Stack Developer

akashsharma01247@gmail.com | +91 8459148074 | Delhi, India | github.com/ak8459 | linkedin.com/in/akashsharma

PROFILE

Full Stack Developer with **2+ years of experience** building production MERN-stack applications across fintech and HR-tech — including a large-scale US lending platform handling \$115B in loan volume and a background verification SaaS serving enterprise clients. Strong in React.js, Next.js, Node.js, Redis-backed auth, AWS deployment, and technical SEO. Focused on end-to-end product ownership, clean architecture, and measurable frontend performance.

PROFESSIONAL EXPERIENCE

Dapplogix Software Pvt. Ltd, *Software Developer*

2024 – Present | Noida, Uttarpradesh

- **Built and shipped** RESTful APIs and backend services using Node.js and Express.js, supporting scalable, multi-role application workflows.
- Developed responsive **cross-platform interfaces** with React.js and React Native, improving usability across web and mobile.
- Implemented **JWT and OAuth 2.0** authentication systems, hardening security across user roles and access layers.
- Optimized **MongoDB queries** and indexing strategies, improving data retrieval performance across high-load operations.
- **Integrated third-party** services including payment gateways and Auth0, extending core product capabilities.
- Maintained code quality through **unit and integration tests** (Jest, Mocha, Chai), reducing regression bugs across release cycles.
- Supported **deployment pipelines**, performance testing, and optimisation of production web applications.
- Managed database operations including **schema design**, data retrieval, and query optimisation for efficient storage workflows.

EDUCATION

Software Development, *Masai School*

12/2022 – 02/2024 | Bangalore, India

Bachelor of Computer Application, *IAMR, Ghaziabad*

06/2019 – 06/2022 | Ghaziabad, UP

TECHNICAL SKILLS

- **Frontend:** React.js, React Native, Redux, HTML5, CSS3, Tailwind CSS, JavaScript (ES6+), TypeScript, Bootstrap, Axios, Next.js, Vite.js
- **Backend:** Node.js, Express.js, RESTful APIs, WebSockets, Microservices, GraphQL
- **Database:** MongoDB, Mongoose, PostgreSQL
- **Version Control:** Git, GitHub
- **Testing:** Mocha, Chai, Jest
- **Authentication & Security:** JWT, OAuth 2.0, bcrypt
- **Cloud & Deployment:** AWS EC2, Heroku, Vercel, Netlify
- **Development Tools:** VS Code, Postman, Docker, npm, yarn
- **On-Page SEO:** Keyword research (intent-based), content optimization, internal linking structures, and meta-data optimization.
- **Technical SEO:** Site architecture, XML sitemaps, robots.txt, schema markup (structured data), and Core Web Vitals (site speed/LCP/FID).
- **Off-Page SEO:** Link building strategies, digital PR, and backlink profile audits.
- **Others:** API Integration, Performance Optimization, Data Structures and Algorithm

PROJECTS

HireStar.io - CandidateSelfVerification Portal

07/2024 – 02/2025

- Architected a full-stack background verification portal enabling candidates to self-initiate verification requests, reducing HR manual effort and turnaround time.
- Designed a secure, role-based workflow engine using Node.js and Express.js with Redis-backed session management and JWT authentication.
- Built a responsive, multi-role React.js UI handling candidate, employer, and admin workflows within a single application.
- Integrated third-party verification APIs to automate background check processes end-to-end.

Tech Stack: React.js | Node.js | Express.js | MongoDB | Redis | AWS | Bootstrap | TypeScript

Hirestar.io - SaaS Landing Site

02/2025 – 08/2025

- Designed and developed a fully responsive corporate website using Next.js and Tailwind CSS with optimized component architecture and bundle size.
- Implemented comprehensive technical SEO strategies including structured data, meta optimization, XML sitemaps, and robots.txt configuration.
- Improved Core Web Vitals (LCP, FID) through performance audits, lazy loading, and frontend optimization techniques.
- Integrated React Hook Form for seamless, accessible form handling across multiple lead capture and contact flows.

Tech Stack: Next.js | Node.js | Express.js | JavaScript | Tailwind css | React-hook-form | On-Page SEO

Amerisave

12/2023 – 05/2024

- Contributed to a large-scale mortgage platform operating across 49 US states, handling high-volume loan processing workflows.
- Built and maintained dynamic, data-driven UI components in React.js with Redux for predictable state management across complex flows.
- Integrated RESTful APIs for real-time mortgage rate calculation and prequalification, improving user decision-making speed.
- Optimized MongoDB queries for faster data retrieval across high-load financial data operations.

Tech Stack: Redux | React.js | Node.js | Express.js | JavaScript | Bootstrap | PostgreSQL | TypeScript | AWS EC2 | Formik.js

SOFT SKILLS

Problem Solving, Ownership & Accountability, Cross-functional Collaboration, Adaptability, Communication
